

Energy Market Researcher

Fascinated by the combination of code and data? Have what it takes to become a master in a domain of interest? This role is for you!

Jether Energy is looking for an Energy Market Researcher to join our team.

This position will focus primarily on investigating, generating and managing complex data projects of various types and sources. You will have ownership of several domains of interest and work closely with our data scientists, developers and ML experts in order to drive efficient decision-making and optimization processes via data-driven insights and recommendations.

What we need you to have?

- M.Sc degree
- 1-3 years of experience as a Researcher
- Good Knowledge in statistical computer languages (Python, R, SQL, etc.)
- Self-learning skills- an ability to master concepts, disciplines and methods quickly
- Passion for technology, data and analytics
- Good communication and interpersonal skills
- Ability to work independently and in a team in a fast-paced environment
- A can-do approach with a desire to tackle complex problems
